OBJECTIVE

Computer Science Engineering undergraduate seeking an internship or entry-level role to apply programming, problem-solving, and engineering fundamentals while gaining hands-on industry experience. Detail-oriented Computer Science Engineering student aiming to secure a software or IT internship where I can apply programming fundamentals, logical thinking, and technical skills to develop efficient solutions while continuously learning new technologies.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering

2022-2026

Vivekananda College of Technology and Management, Aligarh

Affiliated with Dr. A.P.J. Abdul Kalam Technical University (AKTU), Lucknow

EXPERIENCE

Softpro India Computer Technologies (P) Ltd

July 2025-Aug 2025

Intern

- Gaining hands-on experience in software and IT-related tasks
 - Working in a professional engineering environment
 - Assisting in technical problem-solving and learning industry practices
 - Developing teamwork, communication, and time-management skills
-

PROJECTS

PARKING MANAGEMENT SYSTEM

Developed a Parking Management System using C language to manage vehicle parking, track slot availability, and optimize parking space utilization. In this, technologies are used C, File Handling, DS.

ATTENDANCE MANAGEMENT SYSTEM

Developed an Attendance Management System to automate attendance tracking, improve accuracy, and maintain digital records. Implemented an Attendance Management System using software engineering principles and database management concepts.

ONLINE ADMISSION SYSTEM

Developed an Online Admission System to automate student admissions and manage applicant records digitally. Implemented an Online Admission System using software engineering and database management concepts. In this, technologies are used Java, HTML, CSS, JS, DataBase.

E-MAIL SPAM

Developed an Email Spam Detection System to automatically classify spam and legitimate emails using machine learning techniques. Implemented an Email Spam Detection System using Python and data preprocessing techniques.

Blockchain Based AI Model Ownership & Copyright Protection

Developed a secure platform to protect AI models using blockchain technology and IPFS storage. Implemented AI model verification through hash generation and smart contracts to ensure ownership authenticity and prevent unauthorized modifications. Built the project using Python, Web3, and Streamlit for real-time model validation and decentralized storage integration.

SKILLS

TECHNICAL SKILLS

- **Programming Languages:** C, Java, Python
- **Web Technologies:** HTML, CSS, JavaScript
- **Database:** MySQL, MongoDB
- **Tools:** Git, VS Code
- **Concepts:** OOPS, DBMS, Data Structures

SOFT SKILLS

- Team Collaboration
 - Communication Skills
 - Adaptability
 - Quick Learner
 - Time Management
-

CERTIFICATION

- Foundation of AI by Edunet Foundation with Microsoft Collaboration with AICTE
- Cyber Security by EXCELR
- Web Development Fundamentals by IBM SkillsBuild
- Introduction of Cyber Security by GeeksforGeeks
